Incorrect Registration Details in ETS

It has been noted that some brokers are entering incorrect registration details of their clients while setting up trading accounts in Electronic Trading System (ETS) of the Exchange.

In some instances, it has been observed that the same e-mail address and mobile phone number are provided for multiple trading accounts. It is pertinent to mention that important confirmations, circulars and notifications are being regularly disseminated through SMS and e-mails. In the absence of correct e-mail address and mobile phone number, the information will not reach the intended recipient.

Brokers are advised in their own interest to immediately regularize all the trading accounts maintained with the Exchange. Failure to comply with this notice may lead to penal action which may include but may not be limited to imposition of fine, restriction on opening of further accounts and suspension of trading rights.
